Work Experience

company	Lohika (http://www.lohika.com/), June 2015 - now, Senior Software Developer I've been working on various projects as Front-end Developer, most notably: <ul style="list-style-type: none">• made security fixes on large javascript codebase that includes around 300k LOC• created prototype of password strength estimation tool for registration page• designed flexible widget builder that make it easy to modify existing and create new widgets using Ractive.js as js framework• designed validation for widget builder• created widgets using d3.js
---------	---

company Datamart LLC (<http://www.dtm.io>), July 2013 - June 2015,
Software Developer
I've been working on various single page web applications:

- implemented view components using YUI library
- worked at node.js server implementation
- introduced modern build workflow based on grunt task runner
- made contribution to internal widget library
- took a part in creating test suite using YUI test framework
- developed a multi-step registration and login form
- worked at multi-level data management interface
- used plain javascript without third-party libraries

company Vizor (<http://www.vizor.lutsk.ua>), June 2010 - December 2011,
Junior Web Developer
I've been working full time on public transportation monitoring system
- MAK:

- designed and implemented web client using ExtJS
- designed infrastructure for report service using CouchDB as storage and Node.js as backend
- implemented RESTful web service using PHP with Yii and Node.js
- introduced VCS (mercurial) into the team's workflow

Education
